Hosted VOIP PBX Overview

## What is a Hosted PBX Phone System you ask?

A hosted PBX phone system is a full featured VOIP (Voice Over IP) phone system that allows you to take advantage of all the features that a traditional VOIP phone system offers. However, the hosted system does not have all of the up front start up costs and commitments that a traditional phone system has.

What's the Cost?

$60 Per Month, Per Extension

* Price Includes Long Distance

How Does it Work?

You will be provided with quality IP phones that will connect to a real Xorcom VOIP phone system located in our data center. You and your staff can use your phones from anywhere you like - from your office, your home office, remote offices, etc. Your staff will be able to communicate with each other seamlessly no matter where they are physically located.

Powered by XORCOM
