Dear Bryan K. Gardner,

This has to be the best experience I have had with a company such as yours.

You have been able to put our system together flawlessly in less than a week. From answering all our questions, to putting our script together, and porting our phone number, along with the fast service, you have truly amazed us.

I will not hesitate pass your name around to others needing your service.

By the way, the day after you met with us we had another well known telecom company in here and asked for the same type of service. He did not think anything like that was available---he still hasn't called us back.

Thx again.
